

Ironwood retaining wall systems can be used to make sloping areas useful, or to provide the ideal framework for creating stunning gardens. Ironwood fencing does more than just provide privacy. It is a great way of helping to achieve stunning first impressions for your home. Landscaping is all about creating outdoor areas that excel in both form and function. This ideas-guide shows some simple examples of how Ironwood Landscape treated pine can be used to get the best out of any outdoor area.

Ironwood Precision Log and Sleeper Walls

Nothing blends better with our environment than natural timber. Ironwood Precision Logs and Sleepers are produced from plantation grown pine that is a totally renewable resource. They are machined to precise tolerances which means a quality end result and they are preservative-treated to prevent attack by termites and fungal decay. Ironwood retaining walls and garden beds are economical and easy to construct, and they come with a written guarantee.
